

AMIT PADHY

Full-Stack Web Developer · B.Tech Engineering (2026) · Mumbai, MH
amitpadhy604@gmail.com · 8657683208 · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Results-driven Full-Stack Web Developer and final-year Engineering student (2026) with hands-on experience across the complete Software Development Life Cycle (SDLC). Proven ability to design, develop, and maintain testable, efficient code using JavaScript, Node.js, and React. Strong analytical problem-solver adept at troubleshooting, debugging, and collaborating in cross-functional hackathon environments to deliver working prototypes under strict timelines. Seeking an entry-level software development role to apply continuous improvement, technical documentation, and full-stack expertise to drive real product impact.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3, SQL
Front-End: React.js, Responsive Web Design, DOM Manipulation, EJS Templating
Back-End: Node.js, Express.js, RESTful API Development, MVC Architecture, CRUD Operations
Databases & Tools: MongoDB, Mongoose ODM, Git, GitHub, VS Code, Chrome DevTools, npm
Cloud, DevOps & Concepts: Cloudinary, Render (Deployment), Git, GitHub
Tools: VS Code, Chrome DevTools, Postman, npm
Concepts: RESTful Architecture, Database Design, Web Performance Optimization, Agile/Hackathon Workflow

PROJECTS

Wanderlust — Full-Stack Vacation Rental Platform – *Node.js · Express.js · MongoDB · EJS · Cloudinary · Passport.js · Render*

- Designed, developed, and deployed a production-grade web application through the full SDLC, replicating core Airbnb functionality including property listings and user authentication.
- Collaborated on a RESTful Express.js back-end utilizing MVC architecture, ensuring well-structured, testable, and maintainable code across user management and review systems.
- Troubleshooted and debugged system architecture by building centralized async error-handling middleware, reducing unhandled promise rejections to zero and ensuring optimal performance.
- Executed integrated testing and server-side validation for full CRUD operations, ensuring high-quality product functionality and data security.

VoxScript — Hybrid Markup Engine – *Java*

- Currently designing and developing a custom scripting solution that integrates HTML and LaTeX elements to streamline and automate technical document formatting.
- Structuring the core project architecture to efficiently parse and render hybrid scripts, applying continuous learning to maintain a clean, testable codebase.

EXPERIENCE & EXTRACURRICULARS

Hackathon Competitor | A.C.P.C.E *2022 – Present*

- Collaborated effectively within dynamic, cross-functional teams across 3+ intercollegiate hackathons, delivering complete software modules within strict 24-hour deadlines.
- Proactively executed requirement analysis, design, and deployment of full-stack prototypes, demonstrating rapid adaptability to emerging technologies and tools.

Peer Tech Lead — Web Development | A.C. Patil College of Engineering *2023 – Present*

- Facilitated proper knowledge transfer by leading technical documentation and peer-learning sessions on full-stack development for 20+ undergraduate students.
- Organized technical workshops, demonstrating strong problem-solving skills by troubleshooting live coding and deployment issues for 50+ attendees.

EDUCATION

B.Tech Engineering | A.C.P.C.E *2022 – 2026*

H.S.C. Science | G.N. Khalsa College, Mumbai *2020 – 2022*
